

Urba Plus bins can be produced in post-consumer recycled plastic certified "Plastica Seconda Vita" (Second-Life plastic) from the Italian Institute for the Promotion of Recycled Plastics. This option supports the objectives for Green Procurement with the re-use of recycled plastic materials, to help minimise the impact on the environment in manufacture.

Sartori Ambiente is certified according to ISO 9001 and ISO 14001.

Items are packed using PEFC certified pallets.

URBA PLUS 30/40

Urba Plus is a space-saving stackable container for the home or office, for pre-sorting wastes. More waste resources can be segregated at source, to improve the recycling rate and the quality of the material recovered. Urba Plus bins can be stacked two or three high in a stable tower, in the space of one. Filling is easy with the lid flap, utilising the full capacity of each container, without the need to move the bins.

Pivot and handle with automatic locking mechanism and liner trap prevention system

IML (in Mould Label) labeling to body or flap up to 4 colours

Braille imprinting and ideogram to symbolise each type of resource material collected, for aiding the blind or visually impaired.

Front and rear handle for comfortable grip with two hands

High visibility reflectors to each side of the bin

Double hinged front flap on the lid allows filling when containers are stacked

TECHNICAL FEATURES

Capacity: 30 litres

Material

- 100% virgin recyclable PP, with options for recycled content
- Stabilised against the effects of UV light and the weather; resistant to chemical detergents and biological matter.

Lid

- Double hinged front flap on the lid allows filling when the containers are stacked.
- Front flap with finger touch locking, to prevent spillage and littering.
- The flap allows the entire void inside the bin to be filled.
- Close fitting hinged lid with locking mechanism.
- Clip-on lid for quick easy assembly or lid replacement.
- Against a wall, lid may be fully opened without needing extra space.
- Lid with drainage channels and sloping flap for rain water run off.

Body

- Sturdy lowered hinges to allow use of a sack liner.
- Radius corners to allow a sack to be suspended inside the bin.
- Stackable or wall mountable.
- Rear raised grip handle improves handling, for use with gloves.
- Rounded internal base to avoid residue build up
- Smooth internal surfaces for easy cleaning
- Recessed non-slip hand grip on the base for easy emptying when bin is inverted.
- Stepped side walls and wrap around top rim for extra strength
- Front rim recess as extra handling point.
- Side rim recess for optional high visibility reflectors
- Front rim imprinting area for braille
- Microchip nest
- Practical rectangular base for folded newspapers or bottles
- Stackable in a stable vertical tower with minimal footprint, to optimise the use of space.

Handle

- Lid locking mechanism to prevent spillage and interference from birds and animals.
- Strong vertical black handle with non-slip comfort grip.
- Handle can be set in the vertical position, to reduce the need for bending.
- Handle gives two lid opening positions and two lid locking positions.
- Imprinted locking/unlocking guide on lid.
- Vertical handle has 2 pivot points with liner trap prevention.
- Fast unlocking by moving the handle 70° from the locking position.

Options

- Wide range of RAL colours in virgin PP material, with options for 30, 50 or 70% post-industrial recycled PP content.
- Option for certified 75% post-consumer recycled PP content, in grey, green, blue, brown or grey.
- Braille imprinting one letter to symbolise each type of resource material collected.
- Lid imprinting
- IML printing to body or flap in up to 4 colours
- Thermal transfer printing in white on front flap or side of body, with option for bar coding.
- Microchip insertion
- High visibility reflectors to each side of the bin.

Accessory

- Lightweight galvanized steel trolley with smooth running polyurethane wheels for easier maneuverability of containers by the elderly or disabled.
- The trolley is especially useful for corridors and landings in hotels, hospitals and apartments and for footpaths and driveways, for reaching the bin collection point, reducing the need for carrying or assisted collection of bins for emptying.
